How to Save the Bee

Bees pollinate flowers, fruit, vegetables and our healthy raw food.

Bees help flowers, fruit, vegetables, nuts and herbs grow and ripen.

BUT Bees are disappearing at an alarming rate.

How can we **SAVE** the bees?

1. What should we plant more of? _____

2. Bees are thirsty. What should we leave out for them? _____

3. Pesticides kill bees. What should we avoid spraying? _____

4. Bees love bright flowers. What colour flowers should we plant in the garden?

5. On the back, create your own save the bees poster.
